

William Kenny Associates seeking a senior landscape architect or designer with a BLA or similar degree. The position requires strong design, project management, client relations, organizational and communications skills. Proficiency in AutoCAD and SketchUp is essential. Proficiency in Photoshop, Indesign, and Illustrator is beneficial. The candidate will be a primary designer with the firm and will be responsible for all phases of design work from master planning and conceptual design through project construction, including production of detailed construction documents.

William Kenny Associates is an award-winning, high-paced, and multidisciplinary firm that provides landscape architecture and ecological consulting services primarily in Fairfield and Westchester Counties. WKA's ecological consulting services are extensive and at any one time include many habitat-creation, restoration and enhancement design and construction projects. WKA provides landscape architecture services to residential, commercial, institutional, and public landowners. In addition to these services, we have a native plant nursery (NATIVE LLC) that sells and installs native plants and restores and enhances local habits. We look forward to having another LA join our team. The position offers significant professional growth potential.

WKA is committed to providing the finest landscape architecture and ecological services that enable our clients to realize their land-use objectives through sound ecological practices, principals, and creative design solutions.
