Job Listing

R/F is hiring. I am looking for a landscape designer to work with me full-time in the office on my farm in Leeds, NY. The setting is pastoral yet only 15 minutes west of the Village of Catskill, 20 minutes west of the City of Hudson, and 35 minutes north of the Town of Woodstock. New York City is two hours south.

Applicants should have a degree in landscape architecture and up to three years of professional experience. Exceptional design, graphic, writing, and speaking abilities are required. Expert AutoCAD skills, too. In addition to these competencies, the ideal applicant will have completed a season or two of organic farming and gardening.

New hires will focus mostly on design development and contract documentation. However, there is certainly room for advancement. Project management responsibilities will be added as quickly as performance allows.

Active projects include city, country, and beach residences. Institutional and commercial jobs are also common. Much of the work includes ecological restoration, agriculture, and forestry. Please visit www.rfland.com for more information on my firm.

Send a cover letter, resume and portfolio addressed to Jonathan Farber at info@rfland.com.
